Microelectronics and Optoelectronic Devices: From Fundamental Research to Advanced Applications

Message from the Guest Editor

In recent decades, microelectronics and optoelectronics have received widespread attention from academics and industries and have undergone rapid development in both fundamental research and advanced applications, including high-speed information processing in electronics, sensing, display, lighting, energy harvesting, and communication. Microelectronics and optoelectronics devices are the key to future high-tech life, and their fundamental research and advanced applications are closely related. It is vital to enhance the basic research in microelectronics and optoelectronics to guide the mass production applications of integrated devices. Therefore, this Special Issue aims to present research papers, short communications, and review articles focusing on basic research on microelectronic and optoelectronic devices to reveal the underlying physics or mechanisms, as well as cutting-edge applications to present efficient electronic information processing.

Guest Editor

Prof. Dr. Xiao Luo

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.8 days (median values for papers published in this journal in the second half of 2024).
