

Special Issue

Probiotics and the Immune System: The Potential for Postimmunobiotics

Message from the Guest Editors

Welcome to the Special Issue “Probiotics and the immune system: the potential for postimmunobiotics” of *Microorganisms*. As the of this Special Issue, we invite the submission of research articles, review articles, and short communications on the use of immunobiotics and postimmunobiotics to prevent or treat diseases and improve the health of human and animals. This Special Issue welcomes contributions in this field covering the following areas:

- Isolation and identification of novel immunobiotics;
- Identification and characterization of novel postimmunobiotics;
- Design and characterization of immunobiotics- or postimmunobiotics-supplemented functional products;
- Effects of immunobiotics and postimmunobiotics products in the modulation of the microbiota;
- Cellular and molecular interactions of immunobiotics and postimmunobiotics with the host;

Guest Editors

Prof. Dr. Haruki Kitazawa

Dr. Julio Villena

Prof. Dr. A. K. M. Humayun Kober

Deadline for manuscript submissions

closed (31 July 2023)

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 11.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2024).
