Special Issue

Endophytic Fungus as Producers of New and/or Bioactive Substances

Message from the Guest Editor

In recent years, fungi have attracted more attention from natural product chemists because of their great potential for producing new chemical entities, as well as bioactive substances. They can also produce substances similar to those produced by their host plant, which can be very useful in an industrial application. Sometimes, they may produce other molecules with very different chemical skeletons. Thus, this Special Issue will highlight fungi as producers of natural products (especially micromolecules, such as terpenes, flavonoids, alkaloids, etc.), though other biomolecules are also welcome. This Special Issue of *Microorganisms* will also provide a scientific platform for scientists performing chemical and biological studies related to endophytic fungus. Original studies and reviews are particularly welcome.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich
Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 11.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2024).
