

Special Issue

Microbial Infections and Rheumatic Diseases

Message from the Guest Editors

This Special Issue deals with host–pathogen interactions in the development of rheumatic diseases, and the pharmacological aspects involved. We aim to bring together the most innovative research data on this topic, focusing on new biomolecular or bioinformatics discoveries on common or atypical infections and coinfections affecting autoimmunity, as well as associated pathogenic mechanisms (e.g., epigenetics, molecular mimicry, bystander activation, or cryptic antigen formation), the role of microbes in combating rheumatic diseases, and pharmacological aspects (e.g., appropriate management, pharmacokinetics, pharmacodynamics, and drug–drug interactions in patients treated with antirheumatic and antimicrobial agents, including vaccines). Research articles, short communications, reviews, and mini-reviews are welcome.

Guest Editors

Dr. Rossella Talotta

Department of Clinical and Experimental Medicine, Rheumatology Unit, AOU “Gaetano Martino”, University of Messina, 98100 Messina, Italy

Jacopo Angelini

Clinical Pharmacology and Toxicology Institute, University Hospital Friuli Centrale ASU FC, 33100 Udine, Italy

Deadline for manuscript submissions

30 June 2025

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 11.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2024).
