

Topical Collection

Microbial Life in Extreme Environments

Message from the Collection Editor

We are pleased to announce the launch of a new Topical Collection entitled "Microbial Life in Extreme Environments". This Topical Collection aims to provide new insights into any aspect related of extremophiles, from the microbial ecology of diverse extreme environments to the physiology and molecular biology of extremophiles from the three domains and from the fundamental to the applied aspects of extreme microorganisms. We hope that this collection will provide an important forum for the dissemination of highly relevant research findings as well as the sharing of innovative ideas within the field. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 11.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2024).
