

Special Issue

Going Further with Microbial Secondary Metabolites and Biotechnology

Message from the Guest Editors

This Special Issue called “Going Further with Microbial Secondary Metabolites and Biotechnology” is open to review papers dealing with microbial secondary metabolites and related biotechnologies. The state of the art of specific aspects as well as broad overviews of the latest developments in theoretical and technological advances will be welcome. This topic will appeal to researchers interested in the screening of active or useful novel bioproducts, or in microbes’ metabolic investigations, as well as -omic sciences dedicated to microbial biotechnologies. Fermentation pathways, production processes, as well as microbial industrial technologies can be part of this Special Issue. This issue will offer insights into the global knowledge dedicated to microbial biotechnology providing bio-based components and especially secondary metabolites.

Guest Editors

Dr. Mireille Fouillaud

CHEMBIOPRO Chimie et Biotechnologie des Produits Naturels, Faculté des Sciences et Technologies, Université de la Réunion, F-97490 Sainte-Clotilde, Ile de La Réunion, France

Prof. Dr. Laurent Dufossé

Laboratoire de Chimie des Substances Naturelles et des Sciences des Aliments, ESIROI Département Agroalimentaire, Université de La Réunion, 2 rue Joseph Wetzell, F-97490 Sainte-Clotilde, La Réunion, France

Deadline for manuscript submissions

closed (28 February 2023)

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Systems Biology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2024).
