

Special Issue

Mycobacteria Infections and Autoimmune Diseases

Message from the Guest Editors

Zoonosis is increasingly being recognized as a public health implication of *Mycobacterium avium* ss. *paratuberculosis* (MAP). The aim of this Special Issue of *Microorganisms* is to provide MAP researchers with a platform for presenting information about MAP that relates to animal health, food safety, environmental exposure, and human health. To that end, we cordially invite you to submit a research article, review article, or short communication related to one or more of the various aspects of MAP infection: host–MAP interactions, epidemiology, diagnostics, therapeutics, and prevention. Prof. Dr. Leonardo A Sechi

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Systems Biology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2024).
