

Special Issue

Oral Microorganisms and Biofilms

Message from the Guest Editors

The aim of this Special Issue is to call for papers with focus on Oral Microorganisms and Biofilms, including topics such as dental caries, endodontic infections, periodontal disease, peri-implant mucositis, and peri-implantitis, as well as oropharyngeal candidiasis or other oral diseases and oral biofilms related to systemic infections. The development of anti-biofilm-forming dental materials, local delivery antimicrobials, and the use of probiotics or therapies to reduce or modulate oral biofilms is also welcomed. We invite you to submit research articles, review articles, and short communications related to Oral Microorganisms and Biofilms.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.
