

Special Issue

Molecular Epidemiology and Diagnosis of Parasitic Zoonosis

Message from the Guest Editors

This Special Issue aims to collect updated studies on zoonotic parasites, highlighting aspects of the molecular epidemiology and diagnosis of parasitic diseases achieved by using innovative approaches. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Advances in the genomics of parasites, etiological agents of zoonosis;
- Host–parasite interface studies;
- Transcriptomic profiles of parasites, etiological agents of zoonosis;
- Interactions between parasites and the host's microbiome;
- Emerging and re-emerging zoonotic parasites;
- Immune response to zoonotic parasites;
- Epidemiological updates on the most important parasitic zoonoses;
- Possible effects of climate change and anthropogenic impacts on the epidemiology of parasitic zoonosis

Guest Editors

Prof. Dr. Simonetta Mattiucci

Prof. Dr. Antonio Varcasia

Dr. Simona Gabrielli

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Systems Biology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2024).
