

Special Issue

Feature Papers in Mineral Deposits 2020

Message from the Guest Editors

The Special Issue "Feature Papers in Mineral Deposits 2020" will cover topics related to mineral deposits of broader interest to the geoscience community. It will contain review and original research articles that cover recent advances in our understanding of mineral deposits as demonstrated by studies of various scales from a single component of an individual deposit to many deposits in a mineral district to an entire type of deposit worldwide using a wide spectrum of data from field to microscopic to analytical to experimental and more. The articles will be from members of the Mineral Deposits Section Editorial Board and by researchers that they invite. Researchers are welcome to contact a member of the Mineral Deposits Section Editorial Board to be invited.

Guest Editors

Prof. Dr. Theodore J. Bornhorst

Emeritus Professor, Department of Geological and Mining Engineering and Sciences, Michigan Technological University, Houghton, MI 49931, USA

Prof. Dr. Panagiotis Voudouris

Faculty of Geology & Geoenvironment, National and Kapodistrian University of Athens, University Campus, GR-15784 Athens, Greece

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Bayerisches Geoinstitut, University Bayreuth, D-95440 Bayreuth,
Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Mineralogy) / CiteScore - Q2 (Geology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
