

## Special Issue

# Integrated Chronology Studies of Ore Deposits

### Message from the Guest Editor

We enthusiastically invite papers that integrate at least two or more different radiogenic isotope chronometers used to define ore genesis of any deposit type. Ideally, the papers will have chronologic data measured in ores and silicate/host minerals and/or rocks. Geochronologic studies of this nature will illustrate the importance of the following hypotheses regarding the genesis of ore deposits: The duration of mineralization, the importance of singular events, the importance of multiple superimposed events, and timing of mineralization within geologically complicated areas. Several chronometers also provide sources of magmas and metals, and these ideas are encouraged to be integrated within the argument. Keywords

- radiogenic geochronology
- U-Pb
- Re-Os
- Ar-Ar
- Sm-Nd
- Lu-Hf
- Ore deposits
- mineralization events

## About the Journal

### Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Mineralogy) / CiteScore - Q2 (Geology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
