

## Special Issue

# Role of Amphiphil tensides in pharmaceutical formulations

### Message from the Guest Editors

Dear colleagues, Different types of amphiphil tensides are used in topical formulations, especially in ointments that have emulsion bases and in creams that are o/w emulsion type. The property of the emulsifying agent may also influence the penetration of active substance from topical dosage forms. However it is very important to examine the biocompatibility of these surfactants and to determine the non-toxic concentration range of these excipients as well. The aim of this Special Issue is to go deep into those pharmaceutical formulations which contain amphiphil tensides. As , we cordially invite you to contribute a research paper or review on any aspect related to this topic. Dr. Zoltán Ujhelyi

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
