

Special Issue

Electroanalytical Chemistry in Composite Materials, Biomaterials and Mineral Materials

Message from the Guest Editors

Composite materials, biomaterials and mineral materials are critical in the field of healthcare and industry. Their special usages are attributed to their special properties. To discover the nature of those materials, electroanalytical Chemistry is a powerful tool. Cyclic voltammetry (CV), electrochemical impedance spectroscopy (EIS), linear sweep voltammetry (LSV) etc. are all effective methods can be employed. This Special Issue aims to collect papers on electroanalytical chemistry in composite materials, biomaterials and mineral materials, which would have the potential to support their upgrade and application. Topics of interests include, but are not limited to:

- Electrochemistry
- Composite materials
- Biomaterials
- Mineral materials
- Electrode materials
- Ionic liquid

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
