

Special Issue

Green Synthetic Nanomaterials: Preparation, Mechanism, and Application

Message from the Guest Editor

In this Special Issue, we invite investigators to contribute short communications, full research articles, and timely reviews that are related to the green preparation of nanomaterials, characterizations and applications of medicine, and food and environment. Potential topics include, but are not limited to the following: Discovery of new types of nanostructures in green synthesis, including nanoparticles, nanofibers, and nanocrystals. Characterization of molecular interactions among green prepared nanomaterials at the dimension of nanoscale. Innovative techniques to fabricate nanoscale systems for medicine, environment, and food-related applications. Green development of nanocomposite materials from the combination of biopolymer materials and inorganic nanomaterials (including metal nanoparticles, carbon nanotubes, and clay nanosheets).

Guest Editor

Prof. Dr. Xiaoying Wang

State Key Laboratory of Pulp & Paper Engineering, South China University of Technology, Guangzhou 510640, China

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
