

Special Issue

Food Chemistry in Europe

Message from the Guest Editors

This Special Issue of *Molecules* is aimed at collecting papers about food chemistry from European scholars. In Europe, many research groups are working on this topic. For example, there is research on carbohydrates, lipids, protein, vitamins, enzymes, food additives, flavors, and colors. This topic also encompasses how products change under certain food-processing techniques and ways to either enhance these changes or prevent them from happening. In addition, authors are encouraged to publish original research and review articles related to the application of data analytics in food chemistry, in order to extract relevant chemical information and to correlate quality parameters or physical properties. Scientists from Europe are cordially invited to contribute original research papers or reviews to this Special Issue, which discusses new knowledge or new cutting-edge developments in the food-chemistry research field.

Guest Editors

Dr. Papadopoulou Olga

Dr. Patricia Regal

Prof. Dr. Đurđica Ačkar

Dr. Raffaella Boggia

Deadline for manuscript submissions

31 December 2024

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
