

Special Issue

Practical Protocols for Solid-Phase Peptide Synthesis 4.0

Message from the Guest Editors

We are currently celebrating the 60th anniversary of the first public announcement by the Laurate Nobel Prize, R. Bruce Merrifield, of the solid-phase peptide synthesis (SPPS) technique at the Federation Meeting of 1962 in Atlantic City. The first publication (J. Am. Chem. Soc. 1963, 85, 2149–2154) took place one year later. The objective of this Special Issue of *Materials and Protocols* entitled "Practical Protocols for Solid-Phase Peptide Synthesis 4.0" is to bring together the state of the art in SPPS in a single publication. "Practical Protocols for Solid-Phase Peptide Synthesis 4.0" will cover all the practical aspects of peptide synthesis, purification, and characterization, including: resins; protecting groups; coupling agents; cleavage cocktails and their scavengers; solvents for synthesis and purification; synthesis of linear, cyclic, stapled, branched peptides with post-translational modifications; peptide–drug conjugates; and all purification and analysis methods. Special consideration is taken for green chemistry approaches.

Guest Editors

Prof. Dr. Fernando Albericio

1. School of Chemistry and Physics, University of KwaZulu-Natal, Durban, South Africa

2. Department of Organic Chemistry, University of Barcelona, Barcelona, Spain

Prof. Dr. Beatriz G. De la Torre

School of Laboratory Medicine and Medical Sciences, University of KwaZulu-Natal, Durban 4001, South Africa

About the Journal

Message from the Editor-in-Chief

Methods and Protocols (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.
