# Special Issue

# Celebrating the 18th Anniversary of the Invention of the First Nanogenerators

## Message from the Guest Editors

The first nanogenerator was invented in 2005 by Wang's group. Ever since then, several important fields have been coined: piezoelectric nanogenerators, triboelectric nanogenerators, pyro-electric nanogenerators, selfpowered sensors, piezotronics, piezo-phototronics, tribotronics, and more. Their invention has inspired a worldwide effort in energy harvesting and sensors for the Internet of things, robotics, artificial intelligence, human-machine interfacing, blue energy, etc. To celebrate the great success of the nanogenerator field, the journal of Nanoenergy Advances will publish a Special Issue on the occasion of the 18th anniversary of nanogenerators by reporting on the most recent progress in the field. The objective is to continuously promote its development and technological impact. We sincerely invite you to author an article on a topic related to nanogenerators. Thank you very much.

# **About the Journal**

## Message from the Editor-in-Chief

### **Editor-in-Chief**

Prof. Dr. Ya Yang

Beijing Institute of Nanoenergy and Nanosystems, Chinese Academy of Sciences, Beijing 101400, China

### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within AGRIS, and other databases.

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 15.3 days (median values for papers published in this journal in the first half of 2024).
