Special Issue

The Biological Impact of Nanomaterials: From Safety Studies to Applications

Message from the Guest Editors

This Special Issue aims to provide an overview of nanomaterial interactions with cells and highlight the importance to understand the correlations and linkages between their unique physicochemical properties (e.g., composition, structure, dimensions, functionality, etc.) with their applications and biological impacts. Special emphasis will be given to the understanding of the potential repercussions of these materials on human health and environments. Therefore, from this perspective, we would like to invite you to submit research papers or reviews articles discussing and summarizing the state-of-the-art and the most recent advances in this research field, covering material synthesis and applications as well as safety assessment evaluations.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Shirley Chiang
Department of Physics, University of California Davis, One Shields Avenue, Davis, CA 95616-5270, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (General Chemical Engineering)
