

## Special Issue

# Cutting-Edge Nanomaterials for Electronics in Asia: Synthesis, Properties, and Applications

### Message from the Guest Editors

Recent nanomaterials innovation in electronics has been based on the synthesis/fabrication of new nanomaterials, properties with the size and shape, and nano-scale characterization. The enormous variety of nanomaterials for electronic device systems have progressed immensely, and their range of properties and applications appears to be almost endless. Recent printing technologies offer direct deposition of conductive nanomaterials on flexible substrates for cost-effective/large scale fabrication. The printed electronics provide widespread flexible electronics and, more recently, stretchable/soft electronics such as sensors, electronic displays, solar cells, thin-film transistors, and supercapacitors. The studies of nanomaterials in electronics are at the forefront of scientific and industrial applications. This Special issue is going to be focused on “Cutting-Edge Nanomaterials for Electronics in Asia: Synthesis, Properties, and Applications”. ## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

---

### Editor-in-Chief

Prof. Dr. Shirley Chiang  
Department of Physics, University of California Davis, One Shields  
Avenue, Davis, CA 95616-5270, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1  
(General Chemical Engineering)
