

Topical Collection

Hydration on Performance and Health

Message from the Collection Editor

The purpose of this Collection is to present novel reviews and experimental data regarding hydration and its implication for overall health and performance. In the context of sports and physical activity, proper hydration and nutrition are vital components for the optimization of physical and cognitive performance, and for enhancing health and wellness. Despite extensive work in this area, hydration- and nutrition-related topics in this area remain debated within the scientific literature. There remains to be a thorough understanding of the effect of hydration on performance and health, and of the hydration and nutrition requirements to optimize performance. In this Collection of *Nutrients*, we welcome the submission of manuscripts that provide either original research or reviews on the current state of research.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief
