

## Special Issue

# Dietary Components and Immune Function

### Message from the Guest Editor

Each stage of the body's immune response relies on the presence of nutrients. The healthy diet can protect our bodies from harmful autoimmune, chronic inflammatory diseases or cancer and fetal infection following cancer or before harmful autoimmune. How can different dietary components effectively treat immune deficiencies associated with inadequate intake? Can specific nutritional interventions further enhance immune function in subclinical Settings to prevent inflammatory disease from infection or chronic disease? We hope these and other important questions can be answered in this Special Issue. For this Special Issue, we welcome submissions of evidence-based manuscripts, reviews or meta-analyses, and hope that will share valuable knowledge, including but not limited to research on different dietary components related to the immune system.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
