Dietary Lipids in Infants

Message from the Guest Editor

Dietary lipids are the primary source of energy for infants during the first months of life. Beyond covering caloric demands, lipids provide a wealth of bioactive molecules that modulate growth and development; lipid quality thus impacts long-term health. For healthy infants born at full term, lipids are provided via human milk or formula, whereas in critically ill neonates, including very low birth weight infants, intravenous lipid emulsions may also be needed. The human milk lipidome is diverse and complex. In comparison, intravenous lipid emulsions provide a relatively simple lipid blend, and the optimal lipid composition to promote normal infant development is yet to be determined. In addition, recent evidence indicates that dietary lipids such as sphingolipids and specialized pro-resolving lipid mediators can contribute to normal infant development. The present Special Issue of *Nutrients* aims to improve our understanding of the composition of infant dietary lipids, lipid bioavailability, infant metabolism of dietary lipids, and impacts of dietary lipids on short- and long-term outcomes.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)
