Nutritional Impact in Chronic Kidney Disease Patients

Message from the Guest Editor

The goal of this Special Issue, titled "Nutritional Impact in Chronic Kidney Disease Patients", is to focus on the most recent evidence on the role of dietary approaches in patients with chronic kidney disease (CKD), including clinical and translational data on the role of the dietary intake of protein, alkali and acid precursors, and potassium on the development and progression of CKD. The evidence collected in this Special Issue will help both clinicians dealing with CKD patients and researchers in the field of nutrition in CKD.
