Dietary Intake and Behavior in Children

Message from the Guest Editor

Dietary intake in children is not only associated with current and future health, but also with behavior and learning. Especially during early childhood throughout the school-age years, adequate food and nutrient intake to support brain development and function are critical. Furthermore, data on the effect of sugar intake on children's activity levels, or their ability to focus on cognitive tasks, are mixed. More research in nutrition and children's behavior is needed: How does behavior affect children's nutrition? and how nutrition affect children's behavior?

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
