Nutrition in Post-stroke Subjects during Rehabilitation

Message from the Guest Editor

The clinical picture after stroke can be heterogeneous and its evolution and response to the rehabilitation can be very different despite similar clinical status at the onset. Individual factors can modulate the clinical picture and response to the rehabilitation treatment. Nutrition plays an important role in the recovery of patients; however, there are few studies in this field right now. Given the prevalence of malnutrition after a stroke insult and the fact that proper and integrated nutrition can have a significant impact on physical and cognitive function, the scientific community should devote more efforts to this field. The aim of this Special Issue is to examine the current state of diet and nutrition research in post-stroke subjects admitted to rehabilitation centres. Original papers, narrative and systematic reviews, and meta-analyses are welcomed.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
