

Special Issue

Ring Resonator-Based Photonic Devices and Systems

Message from the Guest Editor

Several configurations of resonant cavities with an ultra-high Q-factor have been proposed as key components in telecommunications, quantum electrodynamics and sensing applications. In particular, Whispering Gallery Mode resonators with different sizes and shapes have been exploited to tailor the resonator response, in compliance with the target application requirements. The aim of this Special Issue is to collect original contributions on the advances in resonator-based photonic devices, including, but not limited to, innovative resonator configurations, functional materials, experimental testing, technological processes, and innovative applications, as well as their integration at a system level.

Guest Editor

Dr. Giuseppe Brunetti

About the Journal

Message from the Editorial Board

Optics (ISSN 2673-3269) aims at establishing *Optics* as a leading journal for publishing high impact fundamental research and applications in optics field with a fast processing time and high quality service. The journal particularly welcomes both theoretical (simulation) and experimental research within our journal's scope. We encourage scientists to publish their experimental and theoretical results in as much detail as possible. So, there is no restriction on the length or pages of the papers. The full experimental details must be provided so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in a normal way, can be deposited as supplementary electronic material.

Editors-in-Chief

Prof. Dr. Costantino De Angelis

Department of Information Engineering, University of Brescia, 25123
Brescia, Italy

Prof. Dr. Thomas Seeger

Institut Fluid- und Thermodynamik, Lehrstuhl für Technische
Thermodynamik, Universität Siegen, Paul-Bonatz-Straße 9-11, 57076
Siegen, Germany

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 19.6 days after
submission; acceptance to publication is undertaken in 5.2
days (median values for papers published in this journal in
the first half of 2024).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names published annually in the journal.
