

## Special Issue

# Progress in Synthesis and Applications of Phosphorus-Containing Compounds

### Message from the Guest Editor

Organophosphorus compounds, due to their interesting physicochemical properties, have found wide applications in many important areas of the chemical industry, such as the synthesis of utility chemicals (e.g., flame retardants, anticorrosive coatings, and adhesives), ligands for catalysis, agrochemicals (e.g., insecticides, herbicides, and fungicides), and finally, pharmaceutically active compounds. Unsurprisingly, owing to the importance of phosphorus-containing compounds, several methods have emerged for their effective synthesis also in an asymmetric fashion. This Special Issue of *Organics* aims to provide an overview of the latest progress in the Synthesis and Applications of Phosphorus-Containing Compounds. Experimental contributions, including full papers, communications, as well as reviews describing the synthesis and applications of organophosphorus compounds are welcome.

---

### Guest Editor

Dr. Tomasz K. Olszewski

Department of Physical and Quantum Chemistry, Faculty of Chemistry, Wrocław University of Science and Technology, Wybrzeże Wyspińskiego 29, 50-370 Wrocław, Poland

## About the Journal

### Message from the Editor-in-Chief

*Organics* is a new open-access journal that offers rapid dissemination of innovative, informative, and impactful results in every aspect of organic chemistry, with a particular emphasis on new or significantly improved research results in the field of organic chemistry. The aim of this journal is to encourage scientists to publish their experimental and theoretical results in great detail to facilitate the advancement of organic chemistry. Sample research topics that span the journal's scope are organic synthesis, synthetic methodology, theoretical organic chemistry, physical organic chemistry, supramolecular and macromolecular chemistry, heterocyclic chemistry, organocatalysis, bioorganic chemistry, organometallic chemistry, functional organic materials, etc. We are flexible with the types of manuscripts accepted, including original research articles, short communications, highlights of new developments and insightful critical reviews.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPIus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 41.3 days after submission; acceptance to publication is undertaken in 14.6 days (median values for papers published in this journal in the first half of 2024).
