

## Special Issue

# Advances in Research of the Genus *Mycoplasma* from the Perspective of “One Health”

### Message from the Guest Editors

This Special Issue will focus on the advances in the research of *Mycoplasma* spp. We are in pursuit of high-quality information in this research field that will allow a better understanding of the pathogenesis, virulence, epidemiology, diagnosis, and control of the species of this genus with the support of novel technologies.

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (General Immunology and Microbiology)
