

Special Issue

Epidemiology, Surveillance and Control of Infectious Diseases

Message from the Guest Editors

Scientists with an interest in infectious pathogens have applied epidemiology and surveillance to controlling disease since many years. Following the recent devastating pandemics of African swine fever (ASF) or coronavirus disease 2019 (Covid-19) however, even the public now uses epidemiological terminology and demands better surveillance for preventing future pathogen emergence and spread beyond borders. It is therefore timely and proactive for *Pathogens* to publish this Special Issue. We hope that the collection of papers in this issue will provide insights into the ecological behavior of pathogens and their impact on human and animal populations. As scientists we are aware of the need to focus our investigative efforts on pathogens in wildlife populations, their zoonotic potential, transmission mechanisms, determinants of spread, economic impacts, and options for control. This Special Issue provides a forum for publishing such work. Both original research and review articles are welcome.

Guest Editors

Prof. Dr. Cord Heuer

1. Director EpiCentre, School of Veterinary Science, Massey University, Palmerston North, New Zealand
2. Director OIE Collaborating Centre for Veterinary Epidemiology and Public Health, PO Box 11222, Palmerston North, New Zealand

Dr. Magda Dunowska

Infectious Disease Team Leader, School of Veterinary Science, Massey University, Palmerston North, New Zealand

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (General Immunology and Microbiology)
