

## Special Issue

# Emerging and Endemic Infections in Wildlife: Epidemiology, Ecology, & Management in a Changing World

### Message from the Guest Editors

In this Special Edition, we encourage submissions relating to the identification, monitoring, ecology, or control of emerging and endemic wildlife diseases. This special issue encourages submissions related to bacterial (e.g. *Mycobacterium tuberculosis* complex; *Salmonella* sp.), fungal (e.g. *Batrachochytrium* sp., *Pseudogymnoascus destructans*), viral (e.g. *Flaviviridae*, *Filoviridae*, *Coronaviridae*, *Caliciviridae*), and parasitological (e.g. *Echinococcus*, *Trichinella*, *Schistosoma*) pathogens of wildlife hosts, especially emerging and endemic pathogens with known risks to veterinary and human population health. Authors are encouraged to consider how global change, including climatic, environmental, and societal factors, have influenced the epidemiology of such infections and challenges around their detection and control.

---

### Guest Editors

Dr. Andrew W. Byrne

One-Health Scientific Support Unit, National Disease Control Centre (NDCC), Department of Agriculture, Food and the Marine, Agriculture House, D02 WK12 Dublin 2, Ireland

Prof. Dr. Eric Morgan

School of Biological Sciences, Queen's University Belfast, Belfast, UK

---

### Deadline for manuscript submissions

closed (15 December 2023)

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q2 (General Immunology and Microbiology)
