Topical Collection

The Story of Successful Drugs and Recent FDA-Approved Molecules

Message from the Collection Editors

Each year, the FDA approves dozens of novel small molecules and biological derivatives as new therapeutic compounds, thus demonstrating the vigor of the pharmaceutical industry and associated research groups. Small molecules are the most represented entities among the approvals, but there are also an increasing number of antibodies and oligonucleotides on the medical market. Interestingly, there is a growing interest in the development of orphan drugs and the treatment of orphan diseases and rare diseases. We invite readers of this Topical Collection to explore a range of short but comprehensive and updated reviews on drugs attracting particular attention owing to their success and to their compounds being (recently) approved by the FDA.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (Pharmaceutical Science)
