

Special Issue

Rheumatic Diseases: Pathophysiology, Targeted Therapy, Focus on Vascular and Pulmonary Manifestations 2022

Message from the Guest Editors

Rheumatic diseases represent a heterogeneous group of severe autoimmune disorders. Patients with rheumatic diseases may present with a number of different vascular and pulmonary manifestations. The present Special Issue intends to provide an overview of the diversity and complexity of vascular and pulmonary manifestations of rheumatologic diseases in addition to gaps in knowledge to effectively manage them. Despite their significant morbidity and mortality we have only a limited understanding of their pathogenesis. We wish to provide an overview of the pathophysiology and current management approach of these disorders, highlighting tools which assist with diagnosis, risk stratification, and therapy. Finally, the importance of a multidisciplinary team using the skills of clinicians, radiologists, and pathologists will be highlighted.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter
