Special Issue

Recent Advances in Microneedle-Mediated Drug Delivery, 2nd Edition

Message from the Guest Editors

Microneedles (MNs) have become new generation of topical delivery systems, which are revolutionizing the landscape of transdermal drug delivery. In general, MNs are micrometer-sized needles arranged orderly on a base, and their lengths usually range from 25 to 2000 µm. Research has proved that MNs can penetrate the stratum corneum and create an array of temporary microchannels in the skin, which can significantly increase transdermal drug permeation. In addition, MNs are designed to penetrate into the viable epidermis and upper dermis, to avoid contact with the nerve fibers and blood vessels that reside primarily in the deep dermal layer, resulting in minimal pain and invasiveness. With great patient compliance and efficiency in drug delivery, MNs could offer unlimited potential for the transdermal delivery of various therapeutic agents such as small molecules, biological macromolecules, vaccines, and nanoparticles. This Special Issue deals with all aspects of microneedle-mediated drug-delivery systems including the design, fabrication, and characterization of microneedle formulations, and their use as strategies for the prevention or treatment of medical conditions.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko Department of Pharmaceutics, Ernest Mario School of Pharmacy, Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
