

Special Issue

Multidisciplinary Pharmaceutical Research for Improving Access to Essential Medicines

Message from the Guest Editors

In this special issue, we want to explore *Pharmaceutics* research relevant to improving access to essential medicines, especially in low-income communities around the world. We are keen on cross-disciplinary research exploring opportunities in formulation/development, diagnostics, education, logistics, economics, communication, etc. within the wider scope of pharmaceutical sector and are aimed at improving access to medicines and ultimately healthcare. We welcome research reports, reviews and other relevant communications from participants in pharmaceutical research, industry and regulation worldwide. We are keen to hear from researchers creating 'home-grown solutions' to address challenges which limit access to medicines in their local regions.
