

## Special Issue

# Lipid-based Nanoparticle Systems for Drug Delivery

### Message from the Guest Editors

Nanocarrier technology in drug delivery research has achieved reasonable success in the development of modern therapies, permitting better bioavailability and pharmacodynamics, as well as reducing side effects and providing the possibility of specific targeting of the drug. In particular, due to their biocompatibility and flexibility, supramolecular lipid-aggregate-based nanocarriers, such as lipid nanoparticles, liposomes, nanoemulsions, and micelles, have been the subjects of extensive studies that resulted in several technologies and commercially available therapeutics, including Ambisome, Doxil or recently registered ONPATTRO (patisiran). These seem to be only a small fraction of the opportunities provided by the system built from naturally occurring lipids and similar non-toxic organic compounds. No commercial lipid-based preparation has explored the possibility of targeting the diseased site in the body with lipid aggregate-packed drugs. Hereby, we invite all researchers to contribute to this Special Issue, which will collect review articles devoted to various aspects of lipid aggregate-based drug nanocarrier studies.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko  
Department of Pharmaceutics, Ernest Mario School of Pharmacy,  
Rutgers University, Piscataway, NJ 08854, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
