

Special Issue

Innovative Targeted Drug Delivery and Imaging Strategies for Ischemic Myocardial Injuries

Message from the Guest Editor

The Special Issue addresses innovative strategies to image infarcted myocardium or to deliver active principles into diseased tissue. At present, patients with myocardial infarction benefit from diverse strategies of revascularization. However, revascularization often leads to new cellular and tissue injuries globally referred to as ischemia/reperfusion (I/R) injuries. Some strategies are clinically applied to reduce these I/R injuries. However, these strategies do not sufficiently avert cardiomyocyte losses and remodeling of the cardiac tissue, which ultimately leads to heart failure. In this context, innovative strategies have found their place to achieve the targeted delivery of active principle while further increasing the sensitivity and selectivity of the targets for the cardiac imaging of lesions. For this Special Issue, we invite the submission of manuscripts covering the synthesis and characterization of targeting systems for the imaging and/or therapy of ischemic myocardial tissue (nanoparticles, liposomes, extracellular vesicles, etc.). This includes physical and chemical characterization, in vitro and in vivo assessments, and toxicological assessment strategies.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
