Patient Safety and Adverse Drug Events in Medication Practice

Message from the Guest Editor

Adverse drug events (ADEs) and medication-related hospitalisations are of main concern across the world. It has been reported that medication errors and healthcare-related ADEs are responsible for a considerable percent of treatment follow ups and hospitalisations in healthcare settings. Therefore, there is a need to reduce ADEs and also the provision of safe healthcare services, by healthcare providers, using preventive and pro-active interventions, including optimal prescribing, dispensing, administration and monitoring of medicines, and reporting ADEs. The development of strategies to identify preventable ADEs and incorporate appropriate strategies, by physicians, nurses, and pharmacists in routine care, require knowledge development and evident-based practice. Therefore, this Special Issue aims to open the discussion on medicine management, with a focus on ADEs as important components of patient safety. In this Special Issue, research articles, theoretical and methodological reviews on ADEs are welcomed. Additionally, practical experiences and reflections on the application of advanced technologies and new methods of medicine management for ADEs are encouraged.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2024).
