

Special Issue

Pharmacist Roles Supporting Safe, Appropriate Opioid Use

Message from the Guest Editors

Pharmacists, easily accessible to patients, work at the front line of the opioid crisis. This Special Issue of *Pharmacy* will focus on the roles of pharmacists in opioid misuse mitigation and safety promotion. In particular, we are interested in the following topics:

- Pharmacists' roles in patient education about opioid risks and safety;
- Patient perceptions/ preferences for opioid risks, safety information delivery, and implications for pharmacist roles;
- Strategies, resources, and programs that help pharmacists to reduce opioid misuse;
- Pharmacy education/training impact on pharmacist opioid medication safety roles.
- Systems/organizational and/or interprofessional impacts on pharmacists' roles in opioid medication safety.

Papers can be exploratory and/or intervention focused in nature. Commentaries, robust literature reviews, and research briefs are encouraged in addition to research papers. We invite you to share your research, experiences, and expertise on these and related topics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Jon Schommer

College of Pharmacy, University of Minnesota, Minneapolis, MN 55455,
USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2024).
