

Special Issue

Political Correctness—Towards a Global Ethos

Message from the Guest Editors

Political correctness is presently culturally embedded in a particular socio-historical context, that of the political debates of Western Societies. It stigmatizes some values and promotes norms from the point of view of these societies. It is important to investigate the concepts, assumptions, contentions and controversies of political correctness, to understand how it is practiced, how it develops, how it can be constructed.

Many issues can be addressed:

- Origin and development of the expression “political correctness” and its correlated semantical network in lay thinking and in the public debate.
- The sensible topics of political correctness: liberty, economy, religion, human and animal rights, sexuality, health, education, nature preservation.
- The, so to say, “ten commandments” of political correctness: what is good or/and bad according to political correctness, which actions, for which reasons in what contexts? And why?
- How political correctness is related to central philosophical questions, such as the meaning of life, truth and happiness.

About the Journal

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist— those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Editor-in-Chief

Prof. Dr. Marcin J. Schroeder

The Faculty of International Liberal Arts, Akita International University,
Akita 010-1292, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PhilPapers, and other databases.

Journal Rank:

JCR - Q2 (History and Philosophy of Science) / CiteScore - Q1 (Philosophy)
