

# Special Issue

## High Power Lasers: Technology and Applications

### Message from the Guest Editor

This Special Issue seeks to uncover the underlying science and engineering in the fields of high-energy density physics, high-power lasers, and advanced laser technology, applications, and laser components. Specifically, papers dealing with laser–plasma interactions, ultra-intense pulse laser interactions with matter, attosecond physics, laser design, modeling, and optimization, laser amplifiers, nonlinear optics, laser engineering, optical materials, optical devices, fiber lasers, diode-pumped solid-state lasers and excimer lasers, etc., are solicited. Researchers are invited to submit their contributions to this Special Issue. Topics include, but are not limited to, the following:

- High-power laser systems.
- High-power radiation interactions with matter.
- Laser welding.
- Laser beam characterization and measurement of laser beam parameters.
- Materials for high-power lasers.
- Laser–material interactions.
- High-speed imaging.
- Thermal lensing and optic design approaches.

---

### Guest Editor

Dr. Changqing Cao

School of Physics and Optoelectronic Engineering, Xidian University, Xi'an 710071, China

---

### Deadline for manuscript submissions

closed (20 October 2024)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Nelson Tansu  
School of Electrical and Electronic Engineering (EEE), The University of  
Adelaide, Adelaide, SA 5005, Australia

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Optics)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.8 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the first half of 2024).
