

Special Issue

Recent Advances in Micro/Nano-Optics and Photonics

Message from the Guest Editor

A significant area of research in micro/nano-optics and photonics is interactions between structures and light on a micro/nanoscale, which is fundamental for the fabrication of micro/nanomaterials or structures and the construction of micro/nanodevices. We are pleased to invite you to contribute research on interactions between micro/nanostructures and light. This includes an exploration of new physical principles and fabrication methods for micro/nanostructures, as well as their application as functional devices. This Special Issue aims to present original research articles dealing with micro/nanomaterials, structures and devices. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Nanocrystals
- Perovskites
- Low-dimensional structures
- Laser writing
- Photolithography
- Meta-surfaces
- Microcavities
- Microlasers, microlens, etc.
- Microspectroscopy
- Photonic crystal
- Light field regulation

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of
Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Optics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 14.8 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2024).
