

Special Issue

Advances of Optical Fiber Sensors

Message from the Guest Editor

Optical fiber sensors usually employ fibers as transmission and sensing medium, a large number of sensors can therefore be easily multiplexed due to the large bandwidth of the optical fiber, so that a fiber sensing system is able to collect and transmit an enormous amount of data in a short time. We are pleased to invite you to contribute to our Special Issue "Advances of Optical Fiber Sensors". Original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Physical and mechanical sensors;
- Chemical, environmental, biological sensors;
- Pointwise interferometric sensors, like fiber Bragg grating and interferometers;
- Distributed and multiplexed sensing techniques and networks;
- Micro- and nano-structured fiber sensors;
- Sensors-based on polymer optical fiber;
- New structures and materials for optical fiber sensing;
- New signal processing techniques for optical fiber sensors;
- Industrial applications and field tests.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of
Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Optics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 14.9 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the second half of 2024).
