

# Special Issue

## Biomedical Optics Imaging, Sensing and Therapy

### Message from the Guest Editors

We are aiming at cutting-edge optical and optical-based hybrid imaging systems and image reconstruction algorithms to exploit the interactions of light with biological tissues in vivo and in vitro. This is a multidisciplinary field combining physics, biology, medicine, and computer science to characterize and analyze the optical properties of biological tissues on subcellular, cellular, and tissue scales and their changes related to metabolism and functional information. The ultimate goal is to advance related disease diagnosis and therapy patterns, benefit potential treatment outcomes, and/or develop an in-depth understanding of the biological processes. This Special Issue on “Biomedical Optics Imaging, Sensing and Therapy” will welcome comprehensive research directions.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Nelson Tansu  
School of Electrical and Electronic Engineering (EEE), The University of  
Adelaide, Adelaide, SA 5005, Australia

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Optics)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.8 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the first half of 2024).
