

Special Issue

Bio-Integrated Photonic Materials and Devices

Message from the Guest Editor

This Special Issue focuses on presenting original research in bio-integrated photonic materials and devices, with special emphasis on the design and development of soft organic and inorganic photonic materials; flexible/soft optoelectronics; wearable and implantable photonics; as well as their biomedical applications to advance our knowledge and capability in healthcare, brain-machine interfaces, and disease diagnostics/therapeutics. Researchers from interdisciplinary fields such as biomedical engineering, materials science, mechanical engineering, and electrical engineering are invited to submit their contributions to this Special Issue. Topics include but are not limited to the following:

- Flexible/stretchable bioelectronics;
- Implantable photonics;
- Wearable photonics;
- Biodegradable photonics;
- Multifunctional optical biointerfaces;
- Nano-bio photonic interfaces;
- Biophotonic actuators and sensors;
- Optical characterizations of biological systems;
- Bioinspired and biomimetic photonic materials.

Guest Editor

Prof. Dr. Luyao Lu

Department of Biomedical Engineering, The George Washington University, Washington, DC, USA

Deadline for manuscript submissions

closed (31 October 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of
Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Optics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 14.9 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the second half of 2024).
