Special Issue

Various Applications of Methods and Elements of Adaptive Optics

Message from the Guest Editor

Advances in the field of adaptive optics have produced an expanding toolkit for a growing number of photonics applications, including laser beam propagation, signal processing, vision science, astronomy, and other areas. Innovation in laser adaptive optics is a key to solving various scientific and technological problems, from improving the performance of laser systems to enabling new applications. This Special Issue is focused on a wide range of topics, including but not limited to the following:

- Adaptive optic components and tools;
- Wavefront sensing;
- Control algorithms;
- Beam shaping and control;
- Imaging;
- Astronomy;
- Optical communications;
- Propagation through turbulent and turbid media.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Optics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
