

# Special Issue

## Mid-Infrared Integrated Photonics

### Message from the Guest Editors

The mid-infrared region is an important spectral region in which strong molecular absorption bands and atmospheric transmission windows can be exploited for practical use in medicine, food production, imaging, environmental monitoring, and security. In recent years, the wavelength range over which integrated photonics can operate has been extended to mid-infrared regions. This Special Issue will focus on state-of-the-art research in integrated photonics for the mid-infrared region. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Design and fabrication of novel mid-infrared waveguides;
- Mid-infrared optical materials;
- Integrated mid-infrared photonic devices and their applications;
- On-chip sensors and sensing systems;
- Mid-infrared modulators and photodetectors.

We look forward to receiving your contributions.

---

### Guest Editors

Dr. Li Shen

Wuhan National Laboratory for Optoelectronics, Huazhong University of Science and Technology, Wuhan, China

Dr. Yi Zou

School of Information Science and Technology, ShanghaiTech University, Shanghai, China

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Nelson Tansu  
School of Electrical and Electronic Engineering (EEE), The University of  
Adelaide, Adelaide, SA 5005, Australia

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Optics)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.8 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the first half of 2024).
