

Special Issue

Photorefractive Photonics and Beyond

Message from the Guest Editors

This Special Issue aims to gather contributes on advanced research in photorefractive effects and related light-driven phenomena on materials and relative applications. The focus will include the description of fundamental physics behind light–matter interaction as well as experimental and theoretical results. In an open-minded approach, it looks forward to stimulating cross-fertilization between different research areas dealing with the different light–matter interactions triggering photorefractivity but going far beyond it and exploring new ways to exploit these phenomena. This Special Issue is intended to be a collection boosting the synergy between photonics, processing and fabrication methods, material development, investigation techniques as well as relative applications including innovative approaches and advances. If you would like to contact the , please email . We look forward to receiving your contributions.

Guest Editors

Dr. Annamaria Zaltron

Prof. Dr. Cinzia Sada

Dr. Marco Bazzan

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of
Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Optics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 14.8 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2024).
