

## Special Issue

# Genetic Resources and Ethnobotany in Aromatic and Medicinal Plants

### Message from the Guest Editors

There are a vast variety of plant species that are aromatic and medicinal in the world. These plants have long been recognized for their rich ethnobotanical heritage, bioactive compounds, and diverse potential applications. The usage and ingestion of landraces and wild herbs is preferred differently in different parts of the world. Numerous conservation techniques, including both in situ and ex situ conservation, are required due to the growing interest in the usage of aromatic, medicinal, and nutraceutical plants around the world. The current knowledge of its use worldwide, the scientific developments supporting this traditional knowledge, and strategies for conserving these species will all be covered in this Special Issue of *Plants*. This Special Issue provides an excellent opportunity to combine and synthesize recent research on plant breeding, ethnobotany, taxonomy, biodiversity, ecology, and conservation strategies to understand and promote the maintenance of plant diversity, as well as achieving sustainable agriculture and ecosystem management practices in the world.

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
