

Special Issue

Epigenetics in Plant Development

Message from the Guest Editor

Plants is establishing a Special Issue on "Epigenetics in Plant Development". Epigenetic regulation is essential for controlling spatiotemporal gene expression during plant development. It also enables the plasticity of gene expression in response to environmental stimuli. Thus, epigenetic gene regulation provides insights into developmental regulation, phenotypic plasticity, and environmental adaptation. This Special Issue will consider research papers and review papers on plant epigenetics, particularly on the molecular mechanisms of plant epigenetics, epigenetic gene regulation and priming and epigenetic memory and their roles in plant development.

Guest Editor

Prof. Dr. Hongchun Yang

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
