

Special Issue

Plant Conservation Science and Practice

Message from the Guest Editors

This Special Issue focuses on the complexity and dynamic nature of plant conservation. It welcomes studies offering actionable recommendations across diverse areas, such as field botany, plant and seed biology, in situ and ex situ practices, urban and agro-ecology, and the creation and management of databases. By highlighting the importance of protecting plant diversity, the issue aims to underscore its critical role in securing the integrity of ecosystems and promoting a sustainable future.

Guest Editors

Dr. Giulia Albani Rocchetti

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
